# Linked List (Bağlı Liste)

Elementlerin birbirine bağlı olduğu, her elementin kendinden sonraki elementi tanıdığı ve hafızada bitişik konumlarda depolanmadığı doğrusal bir veri yapısıdır

{"Ankara", "Adana", "Van", "Izmir"}

["Ankara", "Adana", "Van", "Izmir"]

#### Array

#### Memory

Ankara

Adana

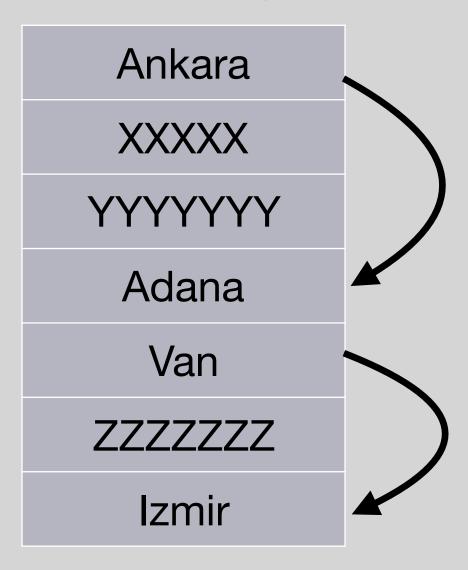

Van

Izmir

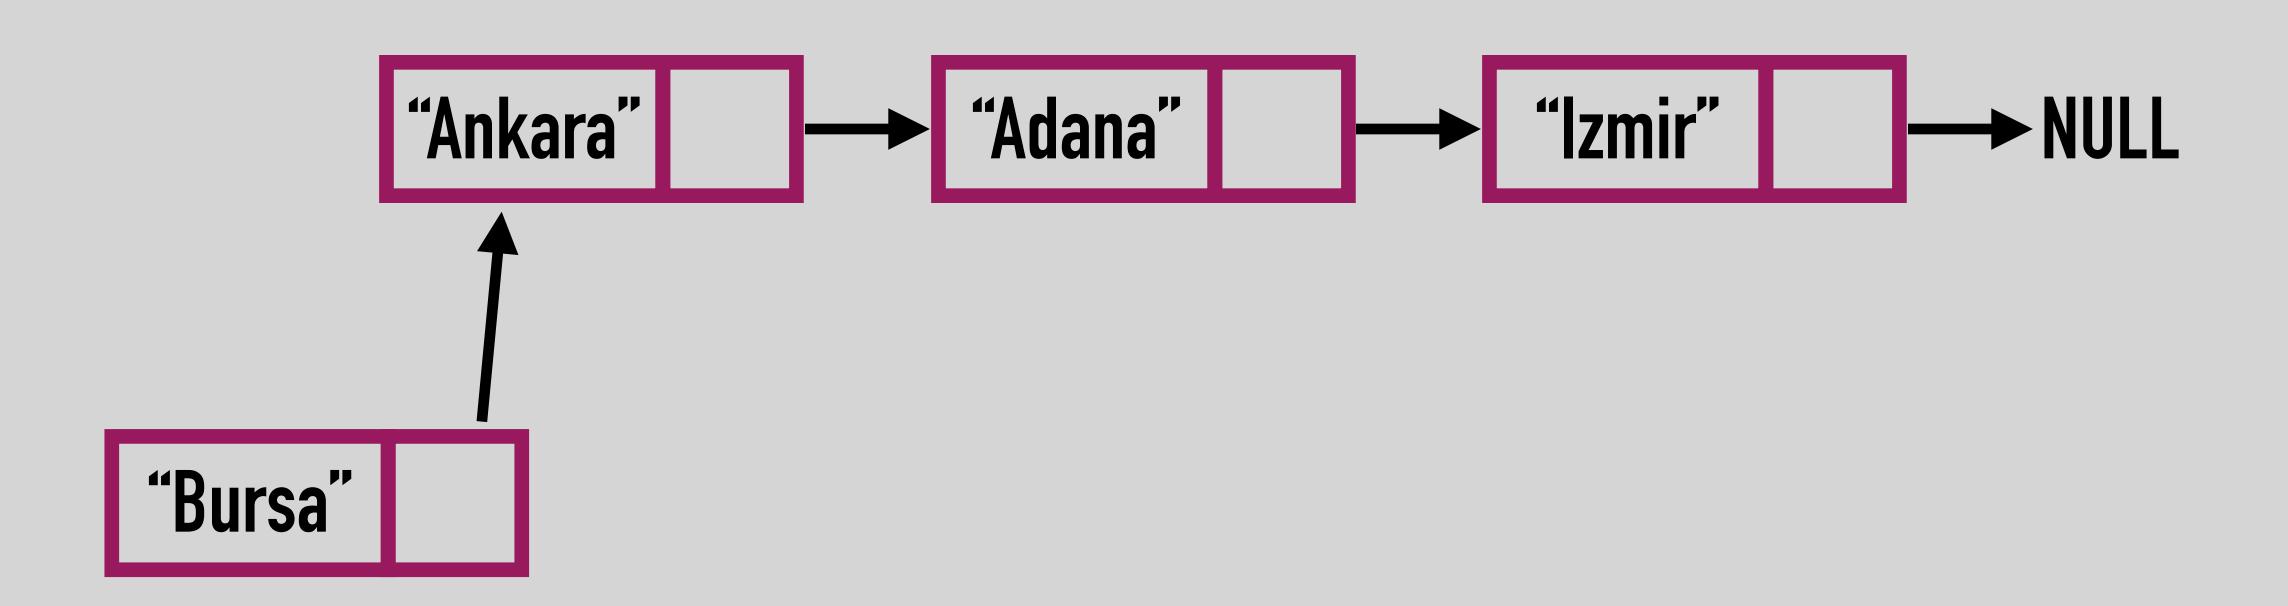

{"Ankara", "Adana", "Van", "Izmir"}

#### Linked List

#### Memory

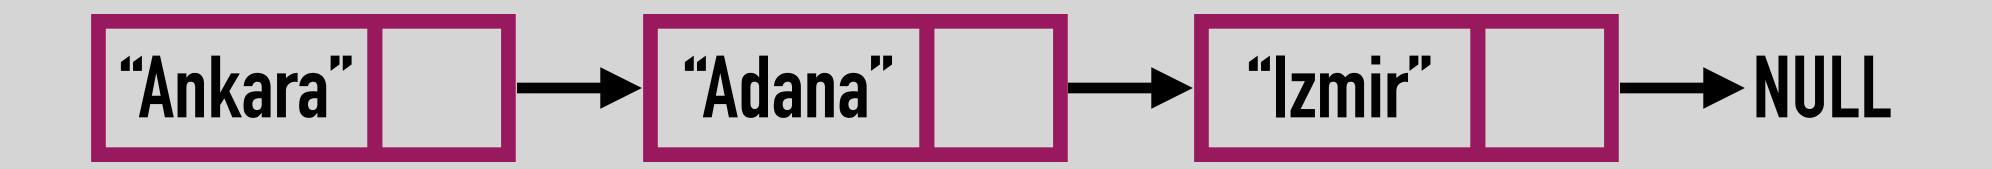

Listenin başına element ekleme

## Linked List Listenin başına element ekleme

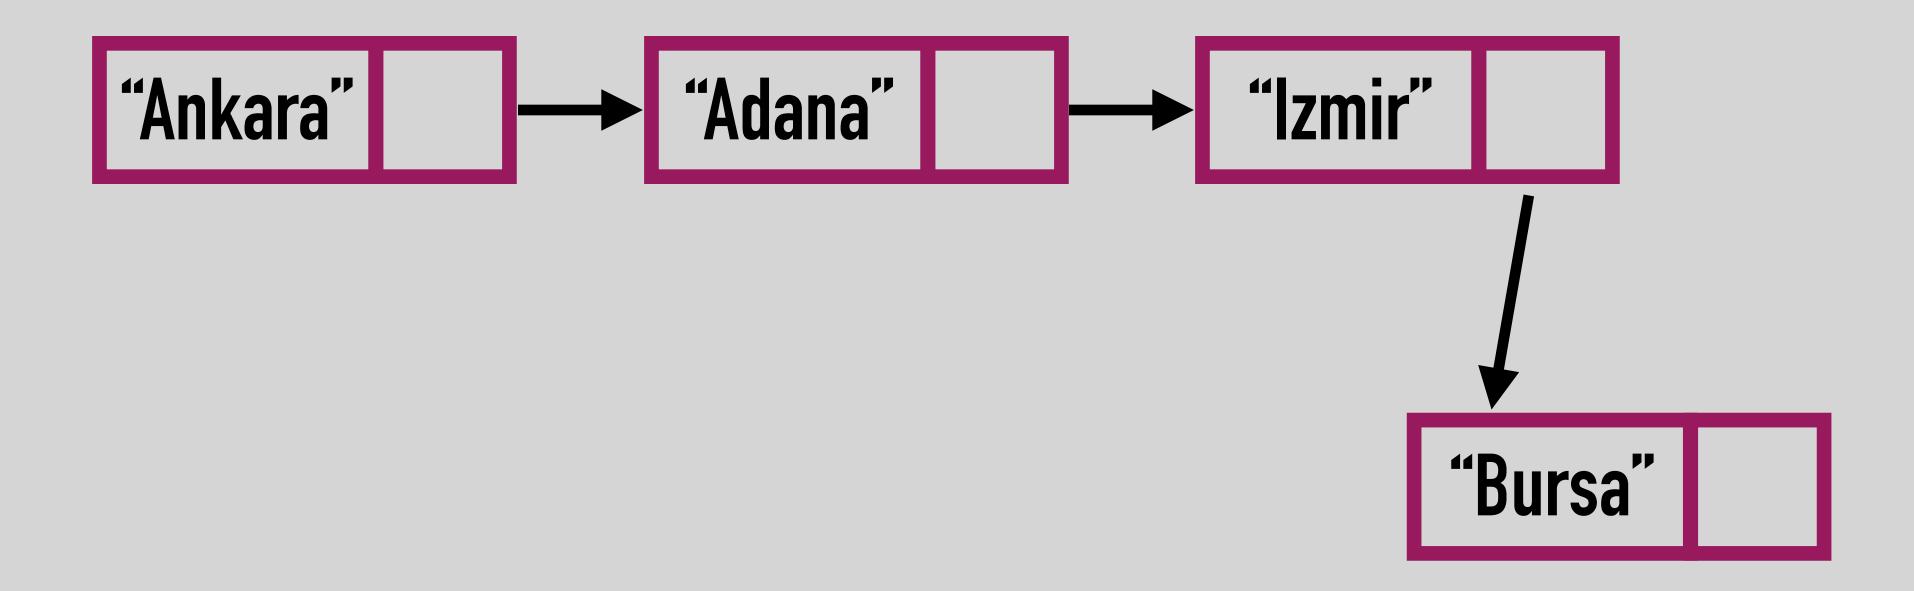

Listenin sonuna element ekleme

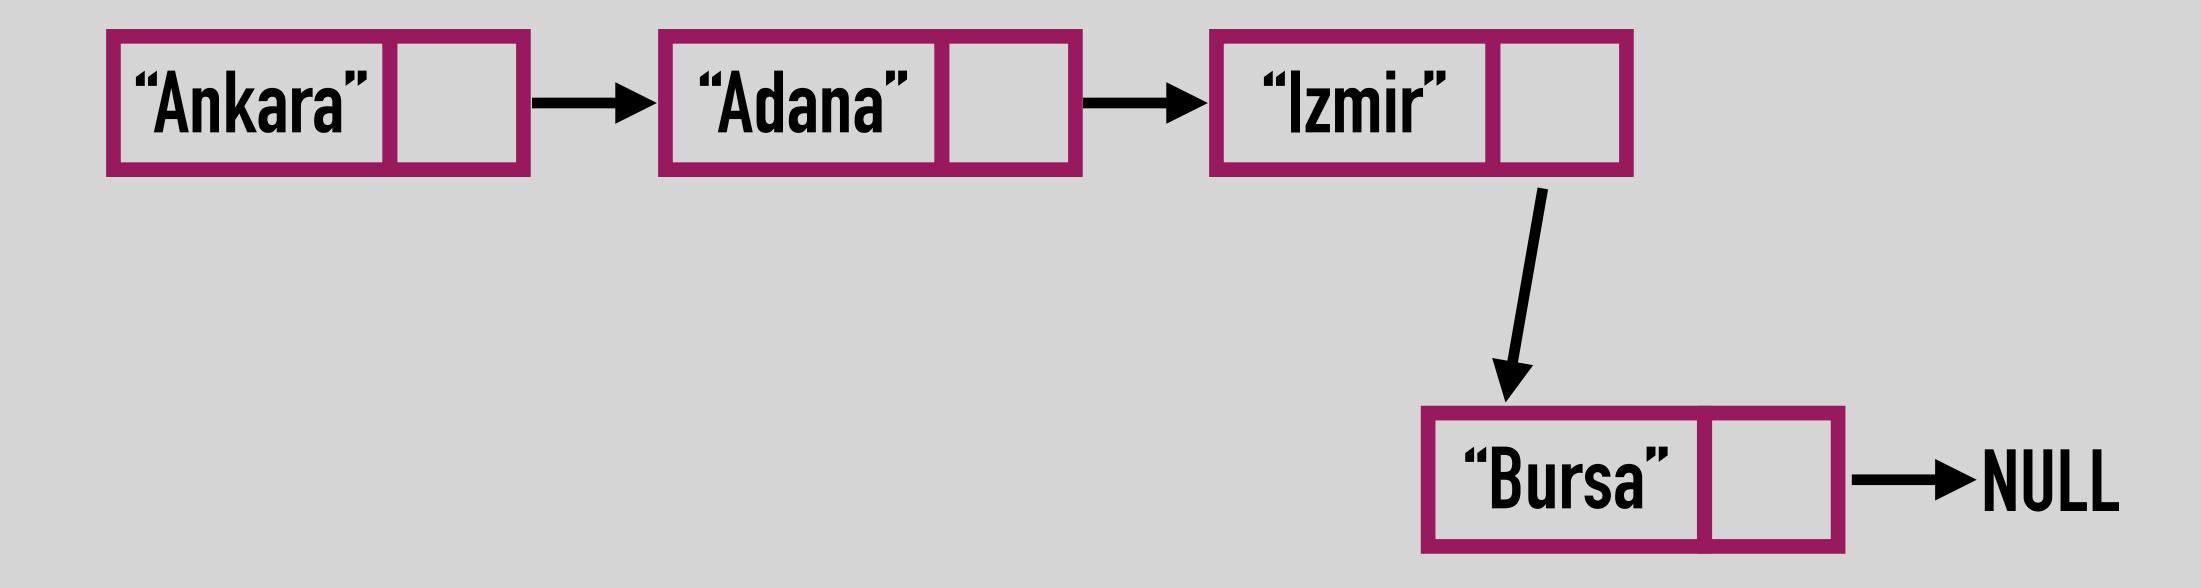

"Bursa"

Listenin sonuna element ekleme

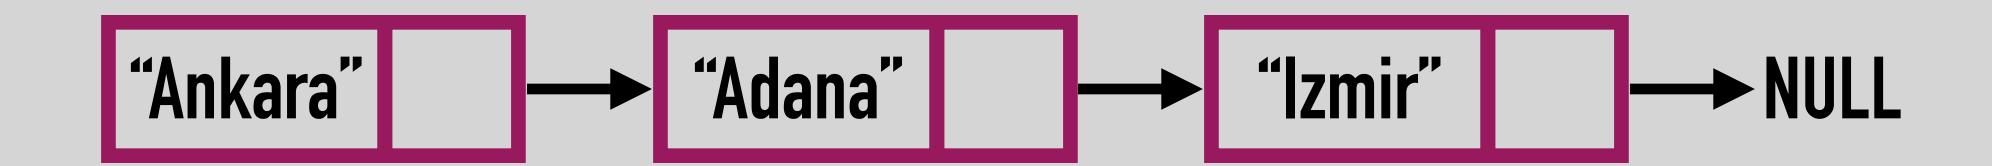

Listenin sonuna element ekleme

## Linked List Listenin sonuna element ekleme

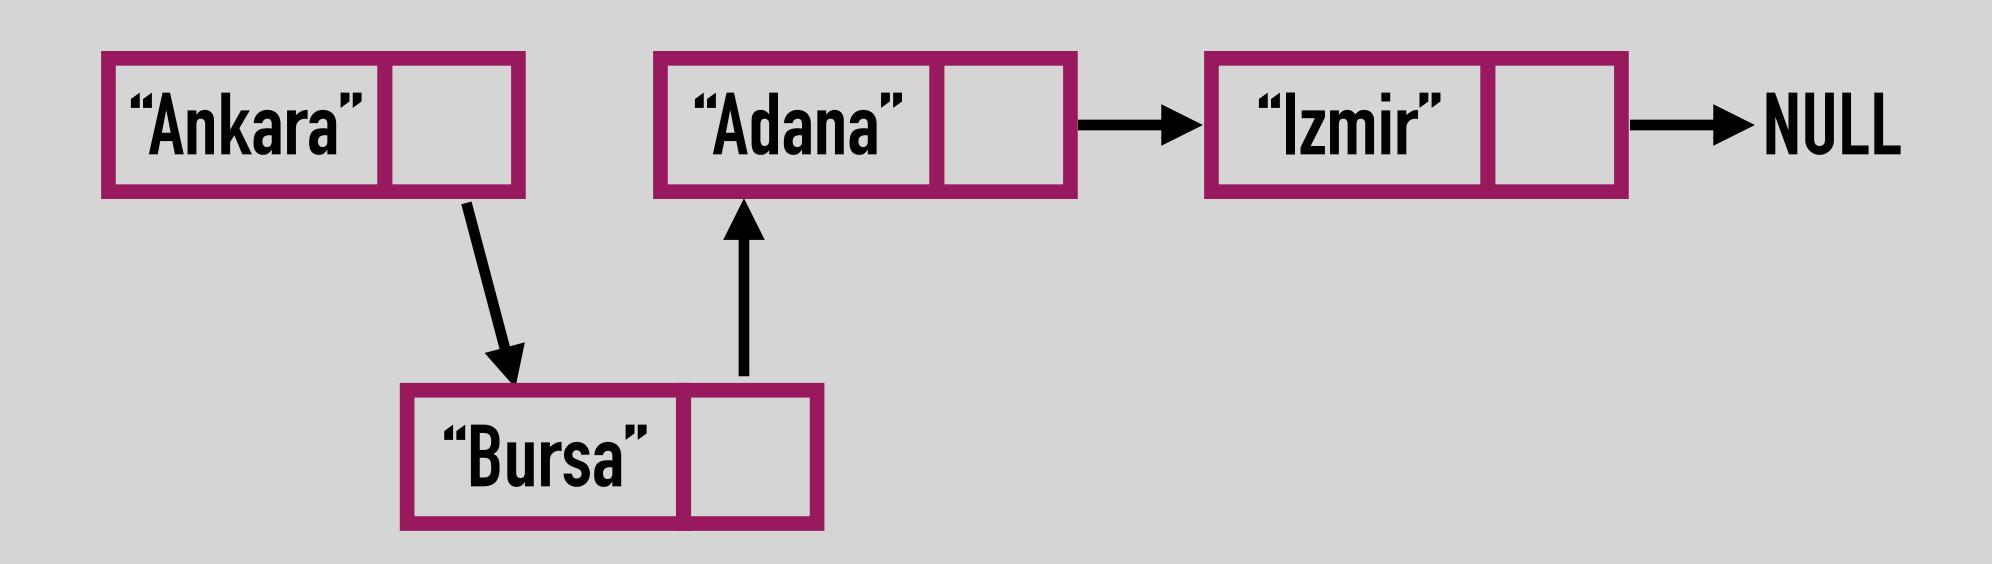

Listenin ortasına element ekleme

"Bursa"

Listenin ortasına element ekleme

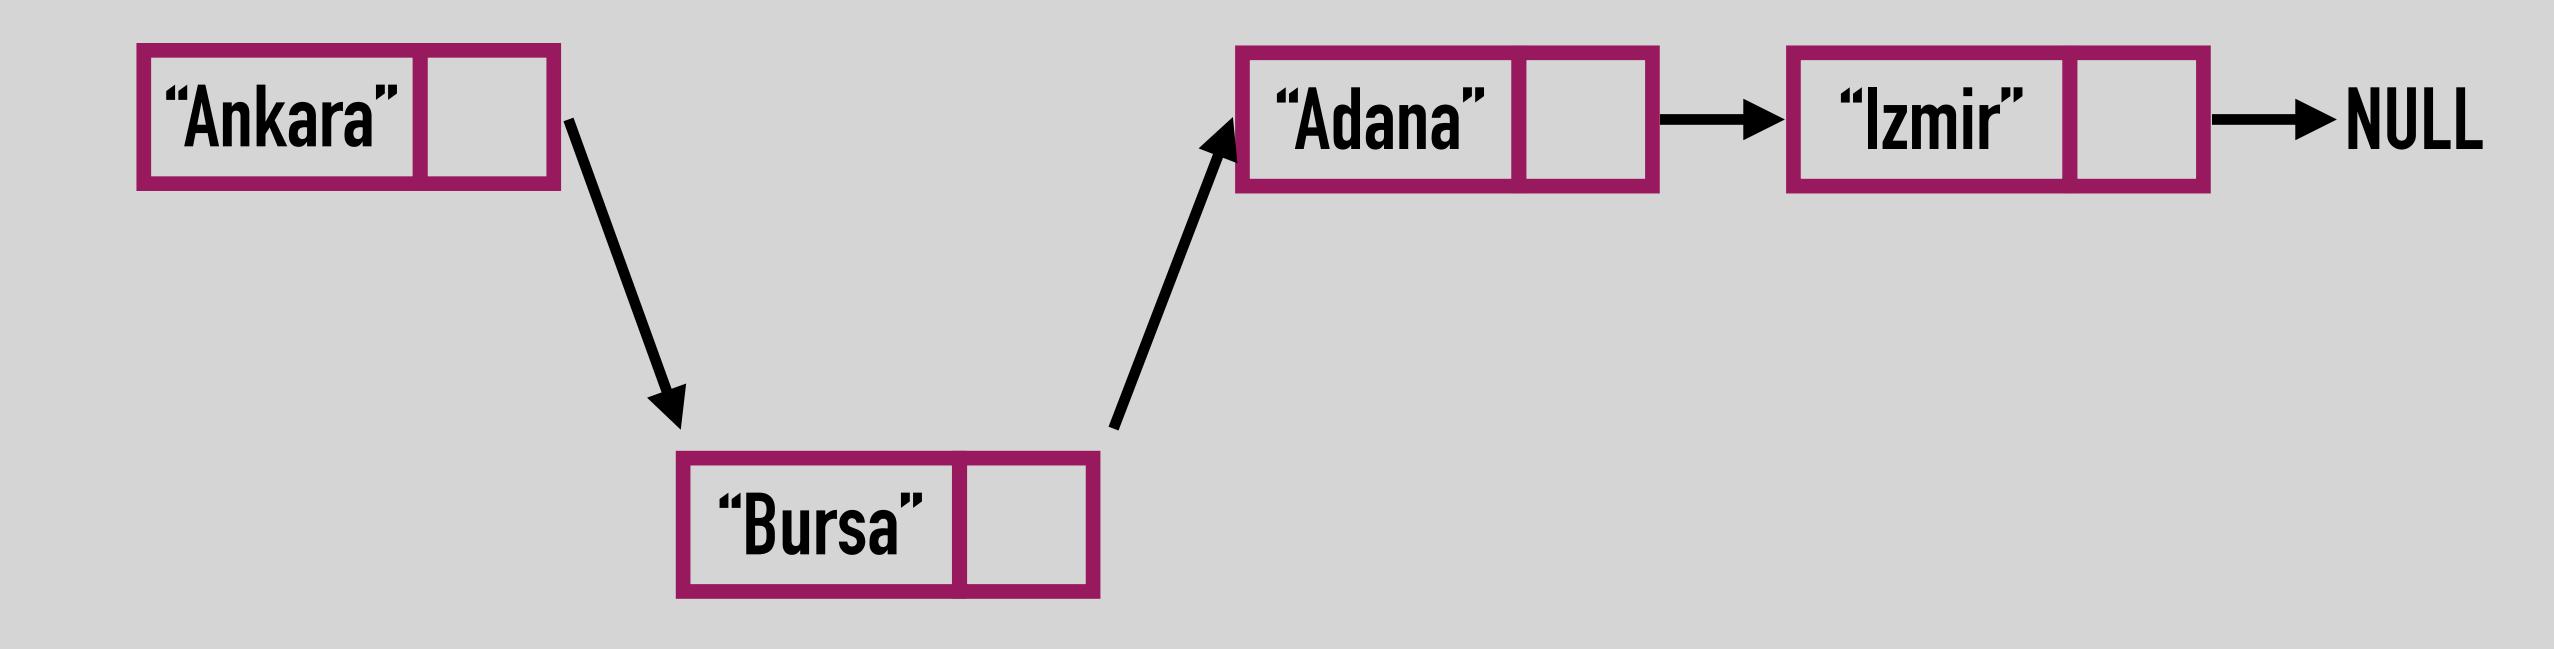

## Linked List Listenin ortasına element ekleme

Listeden bir element silme

Listeden bir element silme

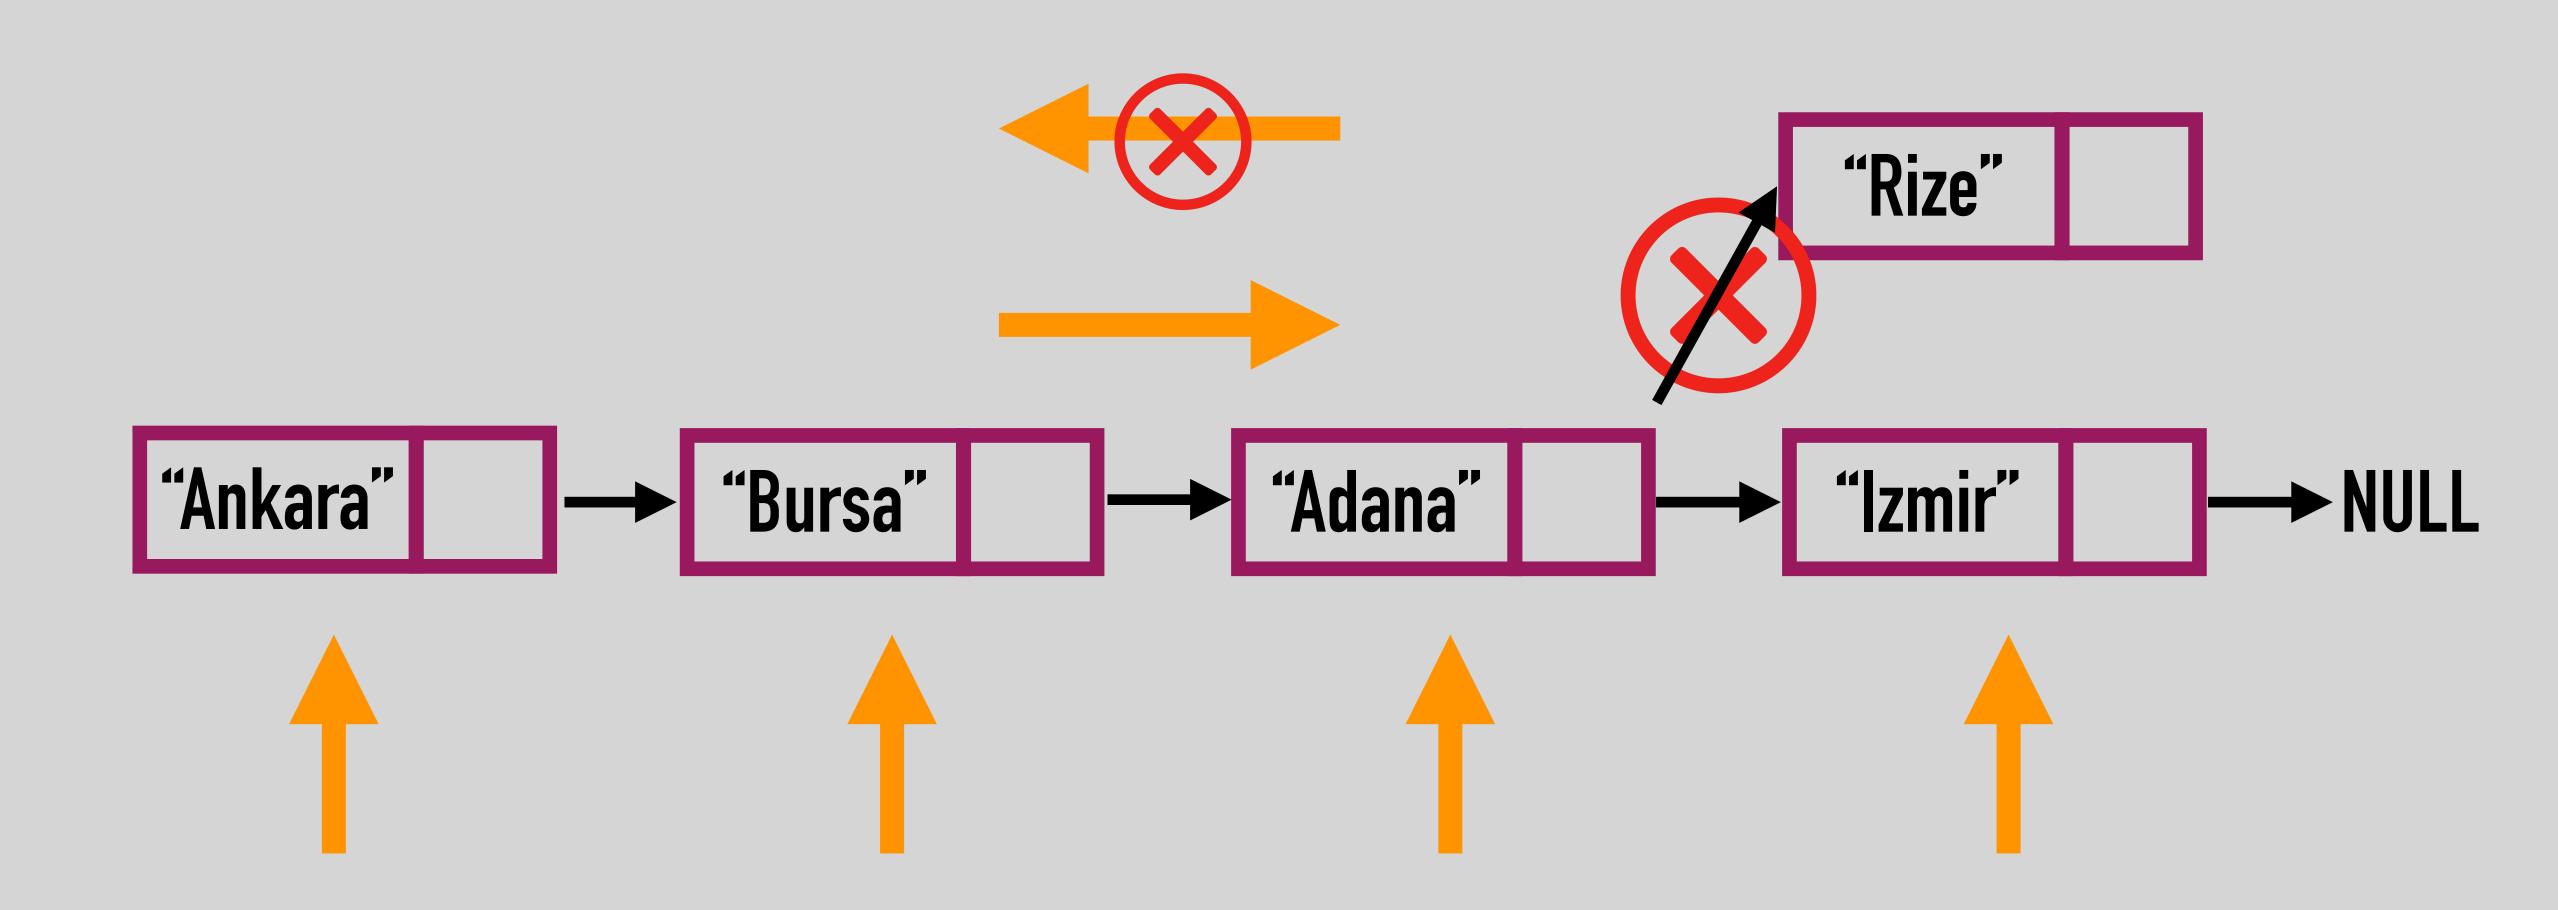

## Linked List Listeden bir element silme

"Ankara" → "Adana" → "Izmir" → NULL

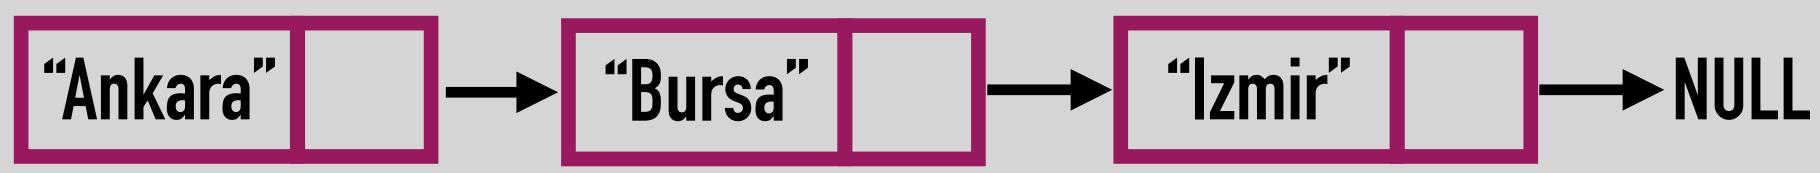

Listeden bir element silme

#### Single Linked List

#### Circular Linked List

	Array	Linked List	Doubly Linked List	Circular Linked List
Başına element ekleme	×			
Sonuna element ekleme	×			
Ortasına element ekleme	(X)			
Her hangi bir yerden element silme	×			
İleri hareket etme				
Geri hareket etme		×		×
Her hangi bir index direk gitme		(X)	(X)	(X)
Hafızayı optimum kullanma	(X)			
Her hangi bir yerden başa dönmek		$\bigotimes$
